THE LINE OF THE LIGHT

It has an "irregular" shape in the real sense of the word. It is formed by the lamps of wires and wires, protected by a metal cage which in Cape becomes a decorative screen. The contrast between the refined bronze glass diffuser and the external cage is enhanced and reinforced every time by the irregularity of the hand-crafting of the steel.

In the suspension lamp version, it is adjustable with a glass white or black shade, in which a touch of white metal cage is applied, or in the new surprising version, bronze with brass cage.

It casts an intense beam of light downwards, which gives the atmosphere a warm, a softness in a well-adjusted tone. In the black or white version, the light diffuses a soft glow into every corner. The bronze diffuser remains the diffusion of light, radiating it with its warm white tones and lighting it with a subtle glow.

Light experience in Moscow, Dublin, Paris, Rome, Madrid.
